Sefi Residential Countertops

Sefi Countertops are custom designed to meet your needs and decor to enhance your home. Whether you are looking to enhance your kitchen work area, bar area or even your laundry room area, we turn your design dreams into reality with handcrafted pieces. Stainless steel is easy to clean/maintain, reflects the color of the room so it will fit with any decor, and light brings out its natural beauty. Complete your countertop with a satin finish to help prevent fingerprints and scratching.

Sefi Commercial Cabinets

Sefi Cabinets are 18GA type 304 stainless steel, flush design with hinged or sliding double pan doors. Wall cabinets have sloping or flat top and base. Cabinets have a double pan bottom. Finish is an elegant brushed satin. Cabinets ship complete and ready to be hung on the wall or base cabinets to be put right into place. Stainless steel cabinets are durable and easily maintained. Many options are available for you to customize the cabinets to meet your needs. Our cabinets are ideal for kitchens, labs, schools, prisons, etc.

Sefi Craftmanship

Sefi Craftmanship starts first with the skilled men in the factory. For the men, working with stainless steel is an art that takes many years to develop. We buy the best material, type 304 stainless steel which has high corrosion resistance and uniformity of finish. Production begins with CNC machine work and final product is finished with a non-directional brushed satin. The finish has the ability to hide and blend scratches for many years. Each product is then carefully inspected and protected for delivery to our customer.

Our factory is located in Amityville, NY. We are 100% Made in the U.S.A. Each man has a specific duty such as polishing, welding as pictured here. They take great pride in their craft and are not satisfied until they have reached perfection.

Drawers and Cabinets are assembled by hand and are specially designed for the application and your convenience. We produce items for large project and for small projects. Our corner cabinet (pictured below) is great for space saving applications.
